Art Unit: 1743

RESPONSE -  
REQUEST FOR  
RECONSIDERATION

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

In response to the Office Action dated January 26, 2007, Applicants respectfully request reexamination and reconsideration of this application in view of the comments that follow.

Claims 18, 19, 56, 57 and 59-61 stand rejected as anticipated by Ershov et al., U.S. patent 5,770,721.

Claim 18, on which the other claims are dependent, is to a dispenser assembly comprising a dispenser chip having a dispenser body with a vertical channel and a sample chip having, among other items, a pillar and a sample surface, wherein the vertical channel of the dispenser chip is cooperatively structured to receive the pillar.

The examiner understands Ershov et al. to disclose such an assembly, wherein a vertical channel of a dispenser chip is structured to receive a pillar (2) of a sample chip.

However, Ershov et al. does not disclose such an assembly. It discloses only a single chip, not a combination of two chips, one designed to receive the other.
